

Claims

I claim:

1. A trash bag support and liner, comprising:

- a single, generally rectangular piece of plastic, and
- a temporary locking mechanism for holding the bag support and liner in a set cylindrical position, the locking mechanism comprising a tab integral with the single piece of plastic, and a cooperating open slit in the single piece of plastic.

2. The bag support and liner of Claim 1 which also comprises a hand hole near an edge of the piece of plastic.

3. The bag support and liner of Claim 1 which also comprises hand holes near two edges of the piece of plastic.

4. The bag support and liner of Claim 1 wherein the locking mechanism tab is near an edge of the piece of plastic, and the cooperating slit is near the center of the piece of plastic.
